

# Tools for mental wellness during pregnancy and after birth

**S**

**Sleep:** Aim for four to six hours of sleep in a row, at least three nights a week. Ask a family member or friend give the first feeding of the night so you can get enough rest.

**U**

**Understand:** Counseling with a trained maternal mental health professional prevents and treats mental health issues. Learn more by calling Help Me Grow at 801-691-5322, or by visiting [postpartum.net](http://postpartum.net).

**N**

**Nutrition:** Take a prenatal vitamin through one year postpartum. Avoid caffeine and sugar when possible. Include protein and unsaturated fats at every snack and meal. Drink two large pitchers of water daily.

**S**

**Support:** Share your feelings with a trusted friend or family member, or find a support group online or in-person. Ask for help with baby care – getting an hour each day to yourself is essential.

**H**

**Humor:** Make time for silliness and joy each day. A funny movie, time with friends, or tickling your children can all improve your mood. If laughing seems impossible, it is time to seek more support.

**I**

**Information:** Take the Edinburgh Postnatal Depression Scale monthly for a year postpartum to track your mental health. Call your provider if your score is 10 or above, or if you marked anything other than “never” on question 10 about self-harm.

**N**

**Nurture:** Care for yourself through: nature, spiritual practices, music and art, meditation, dates with friends, etc. Schedule weekly time in your calendar to do things you enjoy outside of motherhood.

**E**

**Exercise:** Walking 10-20 minutes a day can help your body, mind, and spirit heal and stay emotionally healthy. You can also try yoga or stretching if your provider gives you the go-ahead.
